Subject: RE: Potential PA request radioactive pipe in Bristow OK
Date: Monday, February 03, 2014 10:23:39 AM

Bart,

The pipe came from the Wilcox site from what he indicated during a conversation I had with him on 1-30-2014 at the open house.

Subject: Potential PA request radioactive pipe in Bristow OK

I will get the name of the person from Bill Little tomorrow and will share with you.

Brenda:

During the Wilcox Oil Refinery Open House on 1/30/2014, one of the residents mentioned removing a pipe, taking it somewhere and that it was rejected because it was radioactive. That he could identify where the pipe was removed. Is sort of a confusing story. I don't have the full details. I asked the person commenting about this to identify in a map, or provide us with a more precise location, where was or were the pipe. That he could request a Preliminary Assessment (PA) and he could contact you with a precise location of the area of concern. Be on the lookout if you get a call for a PA.

Todd Downham:

Do you recall hearing this in the Open House? Do you have any further information? Do you know the name of the person who made those comments?
